### PROJECT EXPERIENCE

- Built web applications with HTML5, CSS3, JavaScript, Bootstrap, JQuery and utilized media queries to create different layouts depending on the size of the viewport.
- Created dynamic HTML by using JavaScript to manipulate DOM.
- Created static HTML5 and CSS3 portfolio sites and landing pages.
- Built functional full-stack web applications with Node.js, Express, MongoDB, Mongoose, EJS, CSS3.
- Used Postman to monitor and test APIs.
- Deployed project applications to github and heroku (PaaS).
- Built single page applications with the client-side routing library ( react-router ) and used conditional rendering to only render components if the current route is correct.
- Used React to build responsive applications such as Todo App., Shopping-List App., Hangman Game App.
- Used Hooks to create React applications such as Movie-Picker App.
- Integrated UI libraries like material UI and Bootstrap into React apps.
- Working on building a massive color application with React. Basic functionalities are drag & drop, animations, route transitions, complex form validations.

### WORK EXPERIENCE

#### • Pharmacuetical Representative

##### Sandoz Division, Novartis (Thailand).

- Recorded notes of calls including products discussed, key issues, sample distributed, any other information that will ensure maximum effectiveness for future sales calls.
- Effectively managed and prioritized time to ensure maximum customer penetration and sales volume with limited supervision.
- Evaluated and determined which physicians have greatest opportunity to impact sales and use personalized communication techniques to build and maintain effective relationship with those physicians.
- Kept physicians, nurses, pharmacist and other health care providers up to date on the use of products.
- Analyzed, determined and implemented most effective distribution of product samples in territory.
